

While we agree with the concept of the "Do not call" list and its application to new contacts via facsimile, we are greatly concerned about and opposed to the proposed rescinding of the exclusion for Fax transmissions to individuals or organizations for which we currently have an established business relationship. This action would place an undue burden on both our company and those individuals with whom we currently correspond with via faxes. This method has proven to be convenient and beneficial for both sides. This will also have a negative impact on the provision of continuing medical education which ultimately hurts citizens seeking quality and well informed healthcare. Please strongly consider the likely negative impact your actions will have should you continue with your plan to remove this exemption.
